SHL Engineering Proficiency Test

- SHL评估适用于所有Engineering岗位，PM/PMO/BA等岗位目前不参与评估
- SHL评估模块概览：
  - Automate Pro：支持50多种编程语言，包括Java、Python、JavaScript、NodeJS、PHP、C++、C#等。
  - MCQ(Multiple Choice Questions): 除Automate Pro覆盖的其他skillsets, 通过多选题形式进行评估。
- 评估每年举行两次，首次评估将于2026年4月进行。
- 仅限一次作答机会。基准分数 >50 表示达到相关模块的基础能力水平。
- 考试链接由SHL官方发出，请注意查收个人邮箱。

SHL Assessment Modules Overview

Transform your technical skills with insights from objective assessments

Automata Pro

- Simulated compiler-integrated test designed to measure programming ability
- Candidates can write, compile, and test code in a simulated environment supporting over 50 programming languages, including C, C++, C#, Java, and Python
- assign to resources actively committing code

MCQ (Multiple Choice Questions)

- Technical knowledge assessment
- for resources classified as Engineers working in languages not supported by Automata Pro (e.g., COBOL, AS400, Mainframe), Test and Quality Engineers, or those in Technical or Solution Architect roles.

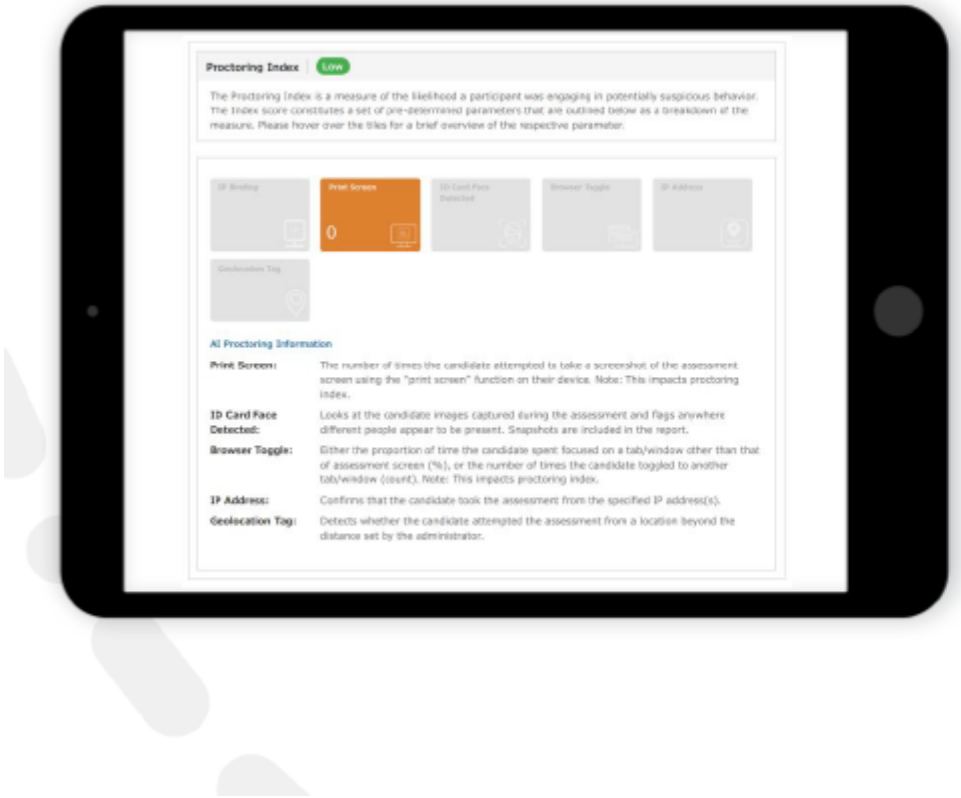
Proctoring and Plagiarism Detection

Stay compliant and confident with behavior tracking and reporting, customized by region.



Track behaviour during the assessment

- Off-focus
- Candidate behavior statistics
- Print screen lock
- Keystroke dynamics
- ID card and candidate snapshot
- Multi-face and no-face detection
- Periodic snapshots

Report on plagiarism risk after the assessment

- Candidate snapshots
- Code replay
- Plagiarism risk
- Candidate and peer code comparison
- Count of browser toggle and print screen
- IP address and geo-location
